- Optional Lava Rock (LAV-BK), GLASS GUARD-12-R, and Grey Glass Cover (12-R-GGC) sold separately
- UL Listed. Made in USA.

A large, round, grey concrete fire pit sits on a stone patio. A bright fire burns in the center of the pit, which is filled with dark lava rocks. To the left of the fire pit is a potted plant with long, thin green leaves. In the background, a blue house with white-trimmed windows is visible. The windows reflect the outdoor scene, including trees and a body of water. The text "Something for every style and space." is overlaid on the right side of the image.

Something for every  
style and space.

- Black stucco base and Polished Midnight Mist Supercast top
- Stores 20 lb. LP tank in base. Made in USA.
- Great for large sectional sofas, as a fire feature, and in commercial spaces

Create ambiance.

# STANDARD MATERIALS

## TEMPERED GLASS

Tempered glass is used for all Glass Wind Guards and Glass Fire Media. It has been heat-treated and is safe to use with our Crystal Fire™ Burners. Untempered glass or glass that has not been heat treated can explode when it reaches high temperatures and is not safe to use with gas fire tables.

## SUPERCAST

Supercast is a proprietary blend of fiber glass and concrete to provide durability and strength. It is stronger and weighs less than traditional concrete. We have a variety of standard colors and finish looks including Mocha, Marbleized Noche, Polished Brown, Polished Midnight Mist, Marbleized Artisan, White Onyx, Natural Grey, Washed Cedar and Barnwood. Custom options available.

## LAVA ROCK

Lava Rock is a naturally produced material and is an additional fire media that can be used in our Crystal Fire™ Burners.

## GRANITE

Granite, a popular choice for its durability, strength, and beauty, is available as an option for several fire tables in both solid pieces and tiles.

## STAINLESS STEEL

Crystal Fire™ Burners, Outdoor Kitchen Accessories, and the Legacy Electric Grill are made from high quality #304 stainless steel. #304 stainless steel is a high quality commercial grade metal.

## VINYL FABRIC

Vinyl fabric is used for many of our fire table and fireplace covers. It is heavy duty, yet lightweight and will protect your investment from the outdoor elements.

## MGOOutdoor BOARD

MGOOutdoor board is used to build many of our fire tables, fire pits, outdoor fireplaces, and custom outdoor kitchens. Made from Magnesium Oxide, the board is non-combustible and resistant to mold and mildew which makes it ideal for outdoor applications.

## STUCCO

Stucco is used on many of our outdoor products and comes in many colors and finishes. Stucco is a low maintenance and durable finish.

## STEEL FRAMING

Steel framing is used to build many of our fire tables, fire pits, outdoor fireplaces, and custom outdoor kitchens. The framing is G90 marine grade galvanized stainless steel that is rust resistant.

## WOOD

Douglas Fir is used for the Sonoma and Lodge II pergolas. Architects and engineers consistently look to use Douglas Fir as a structural lumber for its dimensional stability and superior strength-to-weight ratio. Cedar is used for accents on several fire pits & fire tables. Cedar is also used for the wood beams on the Tuscany-WB-K Pergola.

# FREQUENTLY ASKED QUESTIONS

## CRYSTAL FIRE™ BURNERS

### Where can I use my Crystal Fire™?

These burners are used in all OGC outdoor fire pit tables and fire pits. These burners can be purchased separately as well as for your own DIY project.

### Are these burners UL listed? What does that mean?

Yes all of our burners are UL tested and listed. This means they have passed numerous tests to ensure safe operation. They have undergone wind, rain and clearance tests.

### Are there different Crystal Fire™ models?

We have a few different Crystal Fire™ Burners and over 50 Fire Pit Tables in stock. Many of these can be purchased as one complete unit or individual components can be purchased. Custom fire pit tables & burners are also available. See the Crystal Fire™ section of the catalog for a complete list of burners, sizes, colors, etc.

### If I purchase a Crystal Fire™ Burner for my own project, what else is needed?

Depends on the project. More than likely you will need to purchase a standard control panel, key valve, timer, or automatic ignition, this will allow for easier access to operate your burner from the outside. You may also need to specify the fuel source (LP or NG) used if it is a large or custom burner. We recommend working with your local OGC dealer to determine what is needed for your project.

### Is media included with the Crystal Fire™ Burners?

Yes, we include Crystal Fire™ Gems, diamond color with each Crystal Fire™ Burner (some exceptions on DIY burners, custom burners, etc). The glass used is a heat-tempered-tumbled glass gem.

### How many BTUs per hour are produced?

The BTU rating for each burner varies by size and fuel type. For exact BTU rating see page 31 or consult your burner manual.

### Can I roast marshmallows on my Crystal Fire™?

Yes you can, however this appliance has UL Listed as a decorative gas appliance not a cooking appliance. Also make sure that combustible items do not end up on the burner top, as it will clog the burner ports and prevent a proper burn.

### What type of fuels can I use?

You can choose from either LP – Liquid Propane, or NG – Natural Gas. The Crystal Fire™ unit comes set-up for LP, however there is NG conversion kit that comes with the unit.

## FIRE TABLES & FIRE PITS

### Can I use my OGC fire table on a wood deck?

Yes, all OGC fire pits & fire tables are ok to use on a wood deck if clearances are met. OGC Crystal Fire™ Burners are UL tested and listed. These burners are used in all of our outdoor fire pits. They are ok to use on concrete patios, wood decks, composite decks, etc.

### Can they operate on propane or natural gas?

Yes, they can be operated on either fuel source. The majority of our fire tables come all set up for use with propane and do include a natural gas orifice that can be converted in the field. If converting to NG, a certified gas technician should do the installation. Some of our larger BTU burners and custom burners need to be specified for either LP or NG use. Please contact OGC for specific skus.

### When I push in the black sparker I don't hear any sound?

Be sure to put in a AAA battery, + side facing out into the black sparker box. The push button can be unscrewed and the battery slid in. Connect the two wires running from the burner and you should hear the sparker and see a blue spark at the electrode.

### Is media included with the fire tables?

Yes, we include Crystal Fire™ Gems, diamond color with each Crystal Fire™ Burner (some exceptions on DIY burners, custom burners, etc). The glass used is a heat-tempered-tumbled glass gem.

### Is a propane tank included with my fire table?

Propane tanks are not included with purchase.

### How long will a 20 lb tank last?

Typically you can operate for an average of 8 hours when burning the CF-20 or CF-1224 on high. The CF-2424 & CF-1242 will vary depending on which orifice is used.

### Do I need to cover my fire table when not in use?

It is not mandatory to cover the fire table as it is designed to allow moisture to flow down through the bowl and the unit is constructed of materials to withstand outdoor exposure, however we do recommend covering if not using for extended periods as it will prevent any unwanted debris from falling onto the burner bowl. There are optional vinyl covers available.

### What happens when it rains?

If the fire table is uncovered, water will drain through the gas port holes in the burner, into the burner neck below and out by the air shutter.

Water will not build up in the burner, it will drain out the bottom.

## PERGOLAS

### Do I need to re-stain my pergola?

The wood is prefinished with stain containing UV inhibitors, which slows down fading. We suggest restaining as needed. Each wood piece is hand dipped into the stain allowing the stain to penetrate the wood.

### Does it need to be fastened down?

All pergolas come with fastening devices and fastening is recommended. Pergolas that are not fastened are void of any warranty. See manual for suggested way to fasten to patio or deck.

### Are there custom pergola options available?

No, we do not take custom pergola requests.
