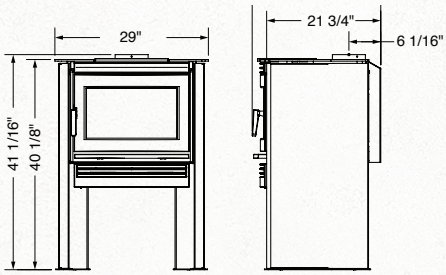
Neo 2.5 offers elegant, modern lines and a practical tall profile design with a larger firebox and higher heat output. With no-stoop loading, a large glass door, and simplified air control, the Neo 2.5 is a practical wood stove with Pacific Energy's clean-burning technology that reduces emissions while maximizing burn length and fuel efficiency. It includes all the features and convenience of the Neo 1.6, including optional porcelain side panels in dramatic colors, and the ability to use the top as a cook stove. Installation is simplified with leveling legs for uneven surfaces.



For reference only. Installations should be based on installation manuals. Specifications subject to change.
