Hearth Products Controls

Fire-inspired since 1975.

“Working with HPC gives you more. Ongoing innovations. Hundreds of CSA- and UL-certified products. The broadest product line in the industry with the longest warranties. Flexibility in flame control. The most useful, easy-to-install kits. Custom design and build capability. And hands-on customer service, including NFI-certified technical support.”

Greg Steck
President, HPC

Safety – Our Top Priority

Product safety has always been, and will remain, our top priority. Currently, we offer Canadian Standards Association (CSA) Group certification on more than 300 models – more than any other fire pit manufacturer in the industry. The CSA Group is the worldwide leader in standards development and product certification, writing both the U.S. and Canadian gas standards.

UL certification is equally respected. It applies to our new Flex Line products that meet specified standards for safety and performance independently verified by a Nationally Recognized Testing Laboratory (NRTL).

Our close relationship with these certifying groups gives us direct access to their technical expertise, ensuring our product safety and giving you and your customers the greatest peace of mind.

FLAME CONTROL

THE GREATEST FLEXIBILITY IN THE INDUSTRY

Three certified technologies to choose from:

ELECTRONIC IGNITION

PUSH-BUTTON/
FLAME SENSING

MATCH-LIT

New and improved remote control electronic ignition

HPC has taken our electronic control module with thermocouple sensing to a higher performance level.

- New hot surface igniter – for natural gas or liquid propane – provides stronger, more reliable ignition with longer life
- Internal temperature monitoring automatically shuts off with overheating
- Flame sensing – automatically relights if flame blows out
- New drip leg manifold brings extra gas valve protection

- New remote control unit – optional with on / off model – offers high / low flame height adjustment and LED fire pit performance feedback
- Meets new 2018 ANSI standards for safety redundant system, humidity and EMC

On / Off Models: Provide on / off operation via a wall switch or optional handheld remote

High / Low Flame Models: Include new remote with on / off functions, diagnostic fire pit feedback and high / low flame adjustment

Match-Lit Kits

For LP and NG applications. Includes burner, valve and key, flange, and fittings.

CERTIFIED FOR SAFETY

CSA- AND NOW UL-CERTIFIED

Fire Pit Inserts

The proven leader in outdoor fire technology, HPC offers:

- More CSA- and UL-certified inserts than any other company
- Inserts in assorted sizes and shapes, including 36" and 42" square and 54" round inserts, as well as Penta burner, H-burner and linear designs
- Three CSA- and UL-certified technologies for all inserts: Match-Lit, Push-Button / Flame Sensing, and Remote Electronic Ignition
- Inserts that come complete with burner, pan and related electronics

Fire Rings and Burners

Available in round, square or rectangular styles with standard or high capacity flow.

- Staggered burner ports for more attractive flame pattern
- Raised hub reduces risk of water in valve or gas line
- Optional pans available for installation ease and containing media

Square Insert

Rectangle Insert

H-Burner

Square Burner

Penta Insert

Round Burner

Patented Penta Burners

More Penta advantages:

- Uses less fuel to attain same flame height as fire ring
- Burner holes at 9, 12 and 3 o'clock – give NO distinct burner pattern on low flame setting
- Low profile design requires less media
- Available with CSA-certified Electronic Ignition or UL-certified stainless steel flex line for easier, faster installation

**CERTIFIED INSERTS ARE
FULLY ASSEMBLED
AND 100% BURN TESTED!**

NEW INNOVATIONS FROM HPC

FLEX LINE INSERTS AND INTERLINK BURNER

New! Flex Line Match-Lit and Push-Button / Flame Sensing Inserts

This new UL-certified manual technology is for fire pits without electricity. It offers greater flexibility for easier, faster installation and is available now with Penta, H-burner and all linear burners. It includes:

- A whistle-free, stainless steel flex line
- Stabilizing mounting bracket
- Highly reliable Dante valve
- Decorative key
- An optional paver block mounting bracket and / or mounting sleeve
- A manual spark igniter (Push-Button / Flame Sensing control only)

*Push-Button / Flame Sensing H-Burner
Available with optional mounting sleeve*

*Match-Lit Penta Burner
Available with optional paver block bracket*

Patent-Pending Interlink Burner

Offers improved performance, reliability and project flexibility compared to other linear products. Available in all three flame technologies in sizes from 25" up to 121".

- Stainless steel pan comes in three sections on 37" and larger models. Center and two extensions allow for easier removal if needed
- Strengthened center section has a welded nipple for gas transfer
- All sizes are 8" wide and 1.5" deep to contain media
- T-burner has raised hub to reduce water risk in valve train
- Staggered burner holes for the best flame pattern and low gas consumption

IGNITING INSPIRATION

UNIQUE FIRE FEATURES FOR COMMERCIAL AND RESIDENTIAL

Copper Fire Bowls

Beautiful, oil rubbed, hammered or smooth finish. No two alike! Assorted sizes and shapes. Available in CSA-certified Remote Electronic Ignition or Match-Lit flame control.

Tempe

Sedona

Mesa

Sierra

Ready-to-Finish Packages

Provides flexibility to finish with stone, veneer, stucco, and brick. Includes certified Electronic Ignition, Push-Button / Flame-Sensing and Match-Lit inserts.

Round

Octagon

Rectangle

Square

Match-Lit TK Torches

Flame-sensing TK Torches for natural gas or liquid propane in black or hammered copper. Head only assembly available for column mounting.

FIRE MEETS WATER

MORE CHOICES, FINISHES, AND SHAPES

Copper Fire and Water Bowls

Beautiful, oil rubbed, hammered or smooth finish. No two alike! Assorted sizes and shapes. Available in CSA-certified Remote Electronic Ignition or Match-Lit. Perfect for poolside!

Tempe

Sedona

Built-in access door offers safe, easy lighting

H2Onfire

FINISHING TOUCHES

ACCESSORIES FOR FIRE FEATURES

Access Doors

Recessed or surface mount Access Doors provide easy access for Match-Lit and other manual systems.

- Simplify installation
- Overcome hard pipe obstacles
- Provide easy lighting and service

Automatic Shutoff Timers

For outdoor use.

- Assorted styles and time ranges

Stainless Steel Flex Lines

The widest selection for outdoor gas fire pits.

- Available in low, standard, high and ultra-high capacities
- Lengths up to 48"
- Whistle-free available

Decorative Key Valves

For gas shutoff of 400k BTU or less.

- Angled or straight styles
- Standard and high capacity

Covers

For covering copper bowls or outdoor fire pits

- Hammered, oil-rubbed copper lids in four sizes and shapes
- Lightweight, powder-coated, shallow covers in black or copper vein color for a clean, low profile look

New! Glass Wind Guards

Surround fire / water features to reduce flame disturbance and prevent loose items from getting too close to flames.

MORE MEDIA CHOICES

New Outdoor Logs

Ceramic fiber logs develop a glow where flame is hottest. Fit linear or rectangular H-burner fire pits. Includes two new styles – Linear Birch in white, gray and tan and Western Pine!

Western Pine

Campfire

Woodland

Linear Birch

Lava rocks provide a base that increases combustion efficiency.

Lightweight black and multicolor river rocks withstand outdoor elements beautifully.

Rolled lava stone provides a smooth finish.

Twenty-eight colors of decorative Fire Pit Glass add the extraordinary.
